DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Frid et al. US 6,137,791.

Regarding claims 1-2, 7-9, 14-15, 20, 26-27, the claimed receiving of device identifier from a mobile unit is disclosed by mobile station (Figure 1, element 20) transmitting mobile identification number to base station (element 30). The claimed determining a home agent for mobile unit based on device identifier is disclosed by base station forwarding MIN to visited mobile switching center (element 4) serving that area and using MIN identifies HLR (element 50) associated with mobile station (element 20). The claimed requesting subscription information from home agent, wherein subscription information comprises an IP address for mobile unit is disclosed by VMSC transmitting location update signal to HLR where HLR has stored data correlating the received MIN with a corresponding IP address assigned to mobile station, and HLR providing subscriber data back to VMSC. The claimed initiating registration of foreign agent with home agent, wherein the registration permits foreign agent to receive redirect packets form home agent is disclosed by GPMSC (element 70) establishing IP tunnel (element 90) with VPMSC. See column 4, lines 14-67 and column 5, lines 1-37.

Art Unit: 2666

Regarding claims 3, 16, the claimed IP address of mobile unit specifying network identifier identical to that specified by an IP address of home agent is disclosed by within PMM network, mobile unit assigned PMM network dependent IP address. See column 5, lines 3-4.

Regarding claims 4, 10, 17, 28, the claimed registration comprising a registration request to home agent including IP address of mobile unit and IP address of foreign agent is disclosed by GPMSC establishing tunnel through use of HLR (element 50) sending it routing instructions including IP address representing VPMSC and HLR retains information about current location of mobile station and correlating of MIN to mobile IP address.

Regarding claims 5, 11-12, 18, 29, the claimed redirect packets addressed to IP address of foreign agent and each redirect packet comprises as a payload a data packet addressed to IP address of mobile unit is disclosed by GPMSC encapsulating IP packet data addressed to mobile station within another IP packet addressed to VPMSC. See column 5, lines 24-27.

Regarding claims 6, 13, 19, 30, the claimed receiving redirect packets, extracting data packets from redirect packets and communicating data packets to mobile unit is disclosed by VPMSC extracting encapsulated original IP packet and identifies mobile station and forwarding extracted IP packet data to VMSC and delivered to mobile station. See column 5, lines 28-37.
